

What You Should Know About Breast Cancer Risk [Podcast]

Fast facts, common myths and misconceptions

October 22, 2018 By Megan Riesz

[Breast cancer](#) is the most common cancer diagnosed in women, and as a result, there is an almost endless stream of information about the disease on the Internet and beyond. One fact we know is that early detection of breast cancer can often make the disease easier to treat, and in some cases, easier to cure. So what are some fast facts that everyone should know about breast cancer risk, and what are some common myths and misconceptions that just aren't true?

We'll tell you what you need to know with the help of two Dana-Farber experts: [Brittany Bychkovsky, MD, MSc](#), and cancer genetic counselor [Jill Stopfer, MS, LSC](#). This is an episode of [Cancer Mythbusters](#), a Dana-Farber podcast.
